SUMMARY

Motivated and detail-oriented fresher seeking a developer role to leverage hands-on skills in web development, application programming, and data visualization. Well-versed in a variety of modern technologies including HTML, CSS, JavaScript, Python, VB.NET, and PHP. Adept at working on academic and personal projects involving databases, IoT, and Android app development. Quick learner with strong problem-solving skills and a passion for continuous learning.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, Python, VB.NET, C#.NET, Java, SQL

Web Development: PHP, ASP.NET

Mobile Development: Android

IoT Platforms: Arduino (C-based programming)

Databases: MySQL, Oracle, SQL Server

Tools & Software: Visual Studio, Microsoft Office Suite (Word, Excel, PowerPoint, Outlook)

Data Analysis & Visualization: Microsoft Excel (Pivot Tables, Charts, Conditional Formatting)

PROJECTS

Birth Certificate Registration System – *ASP.NET (C#), SQL Server*
Built a web app to register and manage birth certificate applications with admin and user modules.

Gas Booking System – *C#.NET*
Developed a desktop app for LPG booking with user login, booking ID generation, and invoice creation.

Bus Booking System – *Java, MySQL*
Created a GUI-based bus ticket booking system using Java Swing and JDBC for database connectivity.

College Management System – *PHP, MySQL*
Designed a portal to manage student records, faculty data, and schedules with secure login.

Employee Management System – *Python (Tkinter)*
Built a desktop tool to manage employee data (CRUD operations) with a simple GUI and SQLite.

Student Management System – *VB.NET, MySQL*
Developed a Windows app to handle student information, attendance, and result records.

EDUCATION

B.Tech in Electrical Engineering
Techno Main Salt Lake, 2020 – 2023
Percentage: 87.7%

CERTIFICATIONS

Full Stack Software Developer– Ramakrishna Mission Shilpamandira Computer Centre

ADDITIONAL DETAILS

- Quick learner, good communicator and respectful in professional environment
- Strong programming logic and real-world project exposure
